# DATA MODELLING AND FORM DESIGN FOR A BUSINESS APPLICATION IN ZOHO CREATOR

## AIM

To design and develop a business application in Zoho Creator by creating a structured data model and designing a **Bank Loan Application Form** using different field types, sections, validation rules, and workflow automation.

## PROCEDURE

1. Created a new application in **Zoho Creator** named **Loan Application & Pre-Screening Management**.
2. Created a form named **Loan Application Form**.
3. Divided the form into four sections:
    - **Section A – Personal Details**
    - **Section B – Contact Details**
    - **Section C – Income & Employment Details**
    - **Section D – Loan Details & Consent**
4. Added the required fields to the form using Zoho Creator's Basic Fields.
5. Configured the following fields:
    - Name – Applicant Name
    - Email – Email Address
    - Address – Residential Address
    - Phone – Contact Number
    - Single Line – PAN Number
    - Multi Line – Purpose of Loan
    - Number – Monthly Income
    - Date – Date of Birth
    - Time – Preferred Callback Time

- Drop Down – Loan Type
- Radio – Employment Type
- Multi Select – Existing Liabilities
- Checkbox – Credit Check Consent

6. Configured mandatory fields and basic validation for important applicant information.
7. Designed the form layout so that related information is grouped together.
8. Created a report to store and display submitted loan application records.
9. Created a workflow that runs when a new loan application record is successfully submitted.
10. Added a **Send Email** action to the workflow.
11. Configured the email recipient using the applicant's **Email** field.
12. Set the email subject as **"Loan Application Received"** and added an acknowledgement message.
13. Tested the form by entering sample applicant details and submitting the application.

**OBSERVATION**

The **Loan Application Form** was successfully designed in Zoho Creator with four logical sections. Different Basic Field types were used to collect personal, contact, employment, income, loan and consent information.

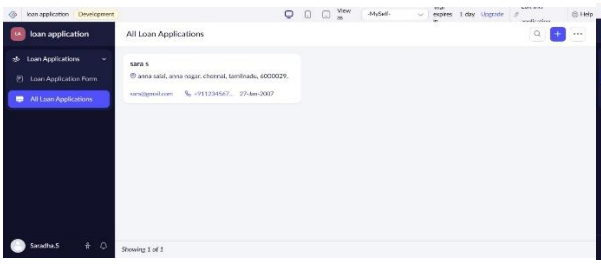

The submitted data is stored as a record and can be viewed through the loan application report.

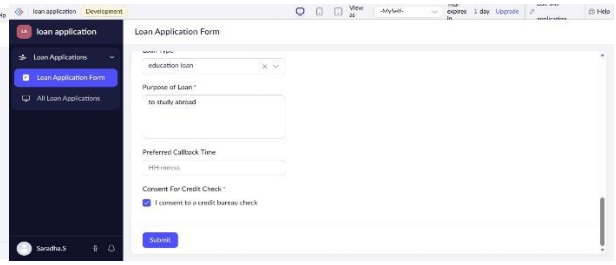

An automated workflow was also configured to execute after successful form submission. The workflow sends an acknowledgement email to the email address provided by the applicant.

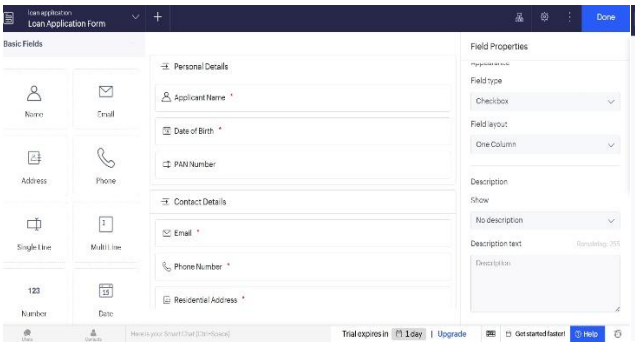

**Observation Table**

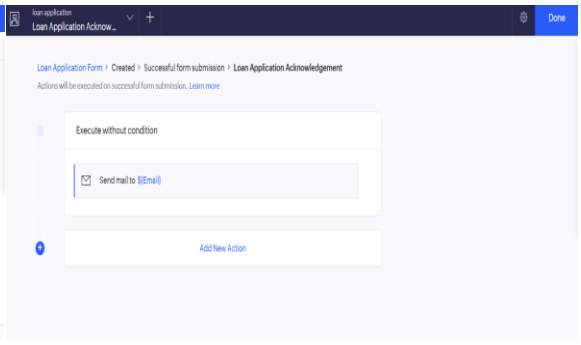

| S.No | Observation | Status |
|---|---|---|
| 1 | Application created in Zoho Creator | Completed |
| 2 | Loan Application Form created | Completed |
| 3 | Personal Details section created | Completed |
| 4 | Contact Details section created | Completed |

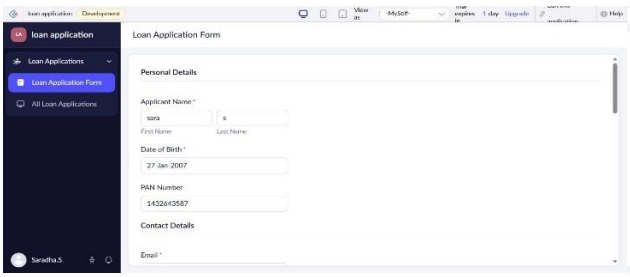

| S.No | Observation | Status |
|---|---|---|
| 5 | Income & Employment section created | Completed |
| 6 | Loan Details & Consent section created | Completed |
| 7 | Basic fields configured | Completed |
| 8 | Mandatory fields configured | Completed |
| 9 | Loan application report created | Completed |
| 10 | Workflow created | Completed |
| 11 | Acknowledgement email configured | Completed |
| 12 | Form tested with sample data | Completed |

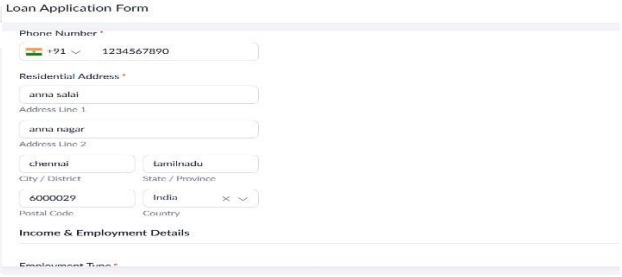

**WORKFLOW OBSERVATION**

The workflow operates as follows:

Applicant fills Loan Application Form

↓

Clicks Submit

↓

Form Validation

↓

Record Created

↓

Successful Form Submission

↓

Send Acknowledgement Email

↓

Applicant receives Email

**RESULT**

The **Bank Loan Application** business application was successfully designed using Zoho Creator. The form was organized into sections using different Basic Fields, and the submitted data was stored as application records. A workflow was also implemented to automatically send an acknowledgement email after successful form submission.

**Thus, data modelling, form design, and workflow automation were successfully demonstrated using Zoho Creator.**
