Exp 6 — Workflow Automation using Deluge

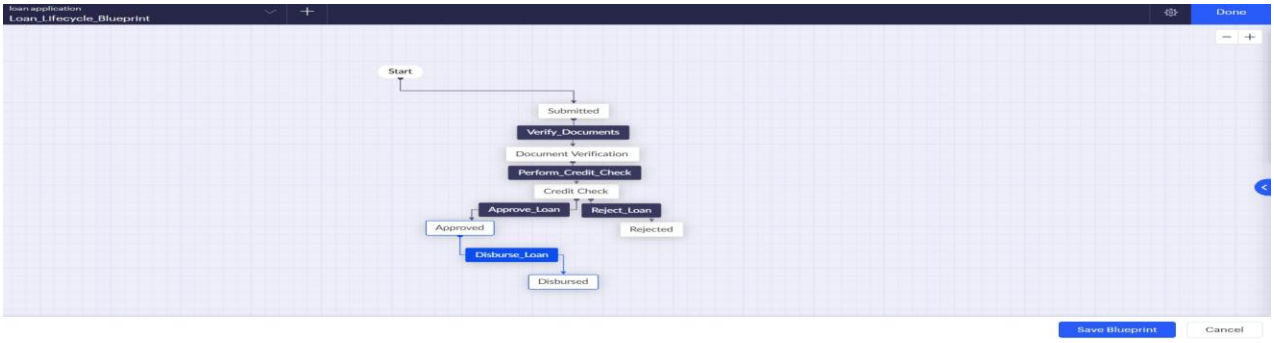

Aim: To automate loan application processing using Deluge scripting in Zoho Creator.

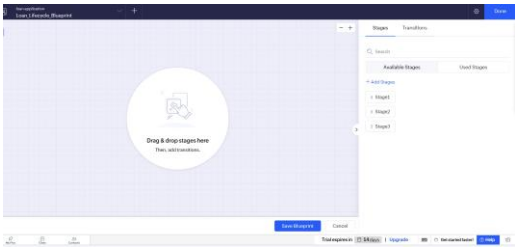

Procedure:

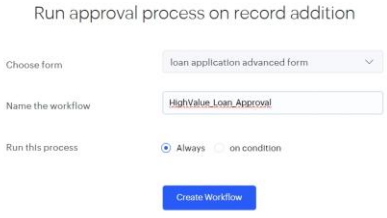

1. Open the Loan Application & Pre-Screening Management application.
2. Open the Workflow section.
3. Create or open a workflow associated with the Loan Application Form.
4. Select the required trigger, such as successful form submission.
5. Configure a Deluge action to perform an appropriate task, such as updating a field or displaying a confirmation.
6. Save the workflow and test it by submitting a sample loan application.

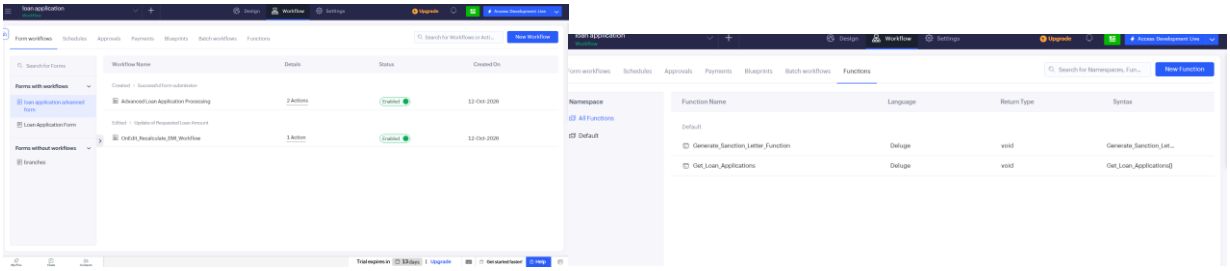

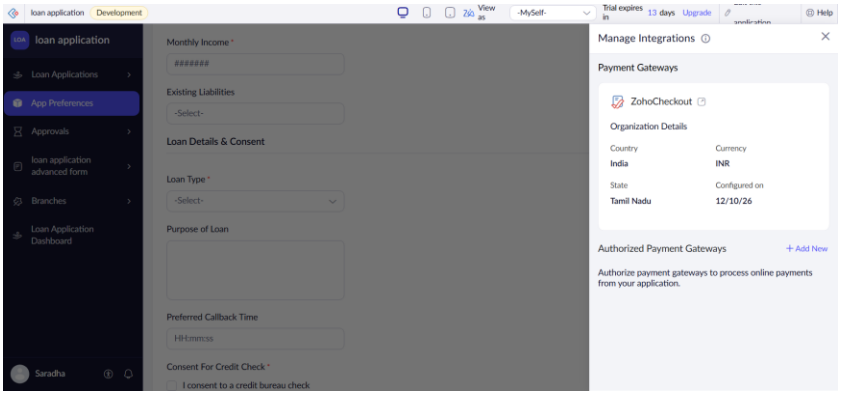

241501187

Result: Workflow automation using Deluge was studied and configured according to the selected trigger and action.
